SPACE FORUM

The platform for regional collaboration & dialogue on space policy across the Americas

Following its successful launch in Washington, D.C., the Americas Space Forum heads to Latin America for the first time, taking place on 30 November – 1 December 2026 in Santiago, Chile.

Co-located with an UNOOSA Regional Space Law and Sustainability Workshop, the Forum will bring together senior representatives from space agencies, telecommunications regulators and government ministries from across Latin America and the wider Americas, alongside leading satellite operators, connectivity providers, technology companies, investors and international organisations.

This unique cross-regional gathering comes at a pivotal moment for the Americas' space sector, as governments develop national space strategies, regulators consider the future of satellite and terrestrial connectivity, and commercial players expand their presence across emerging markets. It offers a valuable opportunity to engage directly with the policymakers and regulators shaping the region's space and connectivity markets, build relationships with national space agencies, showcase expertise and innovation, and position your organisation at the forefront of the Americas' emerging space economy.
